# Ohio Crop Weather

May 2, 2022

## Cool Conditions and Excess Moisture Limited Planting

Below-average temperatures and excess moisture continued to slow fieldwork activities, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. Topsoil moisture conditions were rated 1 percent short, 69 percent adequate and 30 percent surplus. Temperatures for the week ending on May 1 averaged 3.1 degrees below historical normals and the State received 0.76 inches of precipitation, 0.14 inches below normal. There were 2.9 days suitable for fieldwork during the week ending May 1.

Fieldwork activities included tile work, manure spreading, top dressing, and ground tillage. Livestock continue to do well in pastures. Cool temperatures and wet conditions have deterred many row crop producers from planting. **Corn** was 3 percent planted in comparison to 20 percent last year. **Soybean** planting progress was 2 percent, down from the previous year’s progress of 16 percent. **Oats** were 46 percent planted and 16 percent of the oats were emerged. **Winter wheat** jointing was 58 percent while the winter wheat crop was rated 66 percent good to excellent condition.

Soil Moisture: Week Ending 05/01/22

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture .....	0	1	69	30
Subsoil moisture .....	0	0	71	29

Crop Progress: Week Ending 05/01/22
